

WILDLIFE FEEDERS

1,200-Pound Winch Instructions

WARNING:

To prevent serious injury or death, always check the cable, hardware, and mounting of this winch during installation and before each use.

NEVER walk under a hanging feed container or lift more than half of the winch rating. (600 pounds)

Discontinue use of the tripod immediately if the cable, hardware, or mounting is loose or worn.

Do NOT use any other cable or hardware type.

FEATURES:

This 1,200-Pound winch with 30 feet of cable and locking hook is designed to mount directly to any Spinpro tripod with the bolts, washers, and lock nuts provided.

MOUNTING:

This winch **MUST** be mounted to the inside of the middle tripod leg only. The crank handle **MUST** be on the right hand side of the middle tripod leg when facing the tripod from the outside.

The two mounting bolts go through the winch mounting plate then through the middle tripod leg holes that are located about three feet above the ground. The two washers and lock nuts are then secured to the bolts on the outside of the middle tripod leg. The cable **MUST** be positioned on the inside of the tripod safety cable/chain, then over the tripod roller pulley at the top of the tripod.

QUESTION or PROBLEMS:
