

# **SPINPRO WILDLIFE FEEDERS**

## **BLACK PLASTIC SPINNER PLATE**

### **Replacement Instructions**

**Removal:** The spinner plate is attached to the motor shaft and sits directly under the feeder funnel. To remove the spinner plate, place your fingers under BOTH sides of the plate and pull up toward the feeder funnel. The spinner plate should pull free of the motor shaft.

**Replacement:** The spinner plate has a “D” shaped hole in the bottom that aligns with a “D” shape on the motor shaft. Align the “D” shapes on the shaft and hole, and then press down on BOTH sides of the spinner plate then in the middle. The motor shaft should press into the hole. Make sure the spinner plate is on straight to avoid vibration.
